EXECUTIVE SUMMARY

The second quarter of 2026 was a period of sustained operational activity for the Environmental Research and Radiation Safety (ERRS) Department. The department, comprising the Radiation Safety Unit (RSU), Chemical Management Unit (CMU), Environmental Monitoring and Research Unit (EMRU), and Waste & Remediation Unit (WRU), continued to advance its mandate of environmental monitoring, research, licensing, and regulatory oversight to protect Liberia's environmental and public health.

Key achievements during this quarter include the Chemical Management Unit's strong licensing performance, achieving a full response rate on all applications received. The unit issued a total of fifty-six (56) regulatory instruments — twenty-two (22) formal licenses (chemical registration, importation, fumigation, effluent discharge, and transportation) and thirty-four (34) chemical release/clearances, the latter representing the largest single category. The unit also conducted twenty-six (26) critical chemical escort operations and supervised a fourteen-day chemical-waste remediation exercise following the fire incident at the Sethi Ferro Fabrik facility.

The Environmental Monitoring and Research Unit sustained exceptional field performance, receiving thirty-one (31) sachet-water applications, printing thirty-six (36) certificates, issuing thirty-two (32) certificates to compliant proponents, processing thirty-six (36) laboratory results, issuing six (6) laboratory accreditations, and conducting sixty-six (66) environmental investigations across multiple counties. The unit also reviewed twenty-seven (27) environmental monitoring reports submitted by regulated entities.

The Radiation Safety Unit expanded its regulatory and compliance footprint, issuing four (4) radiation bills, inventorying seven (7) medical facilities, and conducting four (4) mining-radiation monitoring investigations. The unit hosted an IAEA Technical Cooperation Expert Mission (May 25–29, 2026), participated in the Nationwide Compliance Monitoring exercise (May 16–27, 2026), and responded to the second set of IAEA comments on the Radiation Safety Act.

The Waste & Remediation Unit continued its facility-assessment and compliance work, conducting ongoing assessments of waste service providers, contributing to multiple ESIA site-verification exercises, and preparing accreditation responses for waste companies. The unit also represented the department at the World Environment Day celebration and the EPA's "Know Your Environment" session.

Despite these successes, the department continued to face cross-cutting challenges, including inadequate logistical resources (vehicles and fuel), insufficient IT infrastructure (laptops and internet), staffing shortages, and the need for specialized technical training. These constraints limited the operational effectiveness of the units, hindering comprehensive fieldwork and timely response to environmental incidents.

SUMMARY OF DEPARTMENT'S MANDATES

The ERRS Department plays a central role in safeguarding Liberia's environmental and public health through research, monitoring, licensing, and regulatory oversight.

The ERRS Department, originally established under the EPA's Department of Compliance and Enforcement, is mandated to conduct routine environmental monitoring and research across various environmental media, including water, soil, air, radiation, and noise. The primary goal is to generate empirical data that informs national policies aimed at preventing environmental degradation, mitigating pollution, and minimizing the impacts of development activities on ecosystems and human health.

Structurally, the Department comprises four core units:

- Chemical Management Unit (CMU)
- Environmental Monitoring and Research Unit (EMR)
- Radiation Safety Unit (RSU)
- Waste & Remediation Unit (WRU)

These units collaboratively execute the department's broad mandate, which includes:

- Issuing licenses and permits for the importation, use, discharge, and disposal of chemicals and radiation sources;
- Accrediting analytical laboratories, waste handlers, industries, and health facilities for the safe use and management of hazardous substances;
- Maintaining national registries for chemicals and radiation sources in accordance with Part IV, Section 44 and Part IX, Section 96 of the Environmental Protection and Management Law of Liberia;
- Reviewing environmental monitoring reports submitted by regulated entities;
- Designing and implementing research programs to address emerging and existing environmental issues;
- Promoting public awareness and stakeholder engagement in environmental monitoring and decision-making.

The ERRS Department is led by a director and operates under a proposed structure that formalizes its specialized units, each playing a vital role in supporting Liberia's environmental governance and regulatory compliance framework.

This report documents the Department's performance and initiatives undertaken during the second quarter of 2026 (April to June 2026), building on the activities of the first quarter to offer a broader context for understanding the progress and strategic direction of the ERRS Department.

OUTSTANDING ACHIEVEMENTS DURING THE QUARTER

CHEMICAL MANAGEMENT UNIT (CMU)

During the second quarter of 2026 (April–June), the Chemical Management Unit (CMU) demonstrated exemplary operational efficiency, achieving a full response rate on all applications received. The unit received forty-eight (48) applications and issued forty-eight (48) responses, and issued a total of fifty-six (56) regulatory instruments across six categories: twenty-two (22) formal licenses (chemical registration, importation, effluent discharge, fumigation, and transportation) and thirty-four (34) chemical release/clearances. Chemical release/clearances represented the largest single category, accounting for sixty-one percent (61%) of all regulatory instruments issued.

Specifically, the unit issued ten (10) Chemical Registration Licenses, four (4) Chemical Importation Licenses, four (4) Effluent Discharge Licenses, three (3) Fumigation Licenses, and one (1) Annual Transportation License, alongside thirty-four (34) Chemical Release/Clearances. The unit conducted twenty-six (26) chemical escort operations, one (1) verification/inspection investigation, one (1) nationwide chemical inventory at Liberia Development Agriculture (LIDA) in Freeport, Monrovia, and facilitated a BCRP training in Bong County in April.

In addition, during the month of April the unit undertook a comprehensive fourteen-day remediation exercise to supervise the removal of chemical waste from the fire incident at the Sethi Ferro Fabrik facility in Iron Factory. The collected waste was subsequently transported and disposed of at the Rayan disposal site in Bomi County.

ENVIRONMENTAL MONITORING AND RESEARCH UNIT (EMRU)

During the second quarter of 2026, the EMRU sustained robust monitoring and research activity. The unit received thirty-one (31) applications for sachet water and issued thirty-one (31) response letters to proponents. It received thirty-seven (37) payments from EPA receipts, printed thirty-six (36) certificates, and issued thirty-two (32) certificates to compliant proponents. The laboratory received and processed thirty-six (36) results from applicants, and the unit issued six (6) laboratory accreditations to proponents.

The unit reviewed twenty-seven (27) environmental monitoring reports submitted by proponents and conducted sixty-six (66) environmental investigations across multiple counties, including lead-in-paint sampling, mangrove research support in Grand Bassa County, compliance monitoring at major mining operations, and noise- and air-pollution investigations in response to community complaints. The unit received eight (8) complaints during the quarter.

RADIATION SAFETY UNIT (RSU)

During the second quarter of 2026, the Radiation Safety Unit (RSU) expanded its regulatory and compliance activities across multiple sectors. The unit conducted radiation inventories and monitoring at five facilities in Monrovia, inventoried seven (7) medical facilities, and conducted four (4) mining-radiation monitoring and investigation activities at Bao Chico Resources, A. B. Conteh Trust Group, Western Cluster Liberia, and Bea Mountain Mining

Corporation. The unit issued four (4) radiation bills and prepared and sent non-compliance notices to facilities operating radiation-emitting equipment.

The unit hosted the IAEA Technical Cooperation (TC) Expert Mission to support the development of staffing levels and training for the Regulatory Authority staff (May 25–29, 2026), participated in the Nationwide Compliance Monitoring exercise (May 16–27, 2026), and responded to the second set of the IAEA's comments on the Radiation Safety Act. RSU staff also participated in the Regional Meeting on Radiation Safety Infrastructure in Africa (Nairobi, Kenya, June 1–5, 2026), the Workshop on the National Implementation of the Biological Weapons Convention (Mamba Point Hotel, April 28–29, 2026), and the Seminar on the Global Energy Governance System in Developing Countries (China, June 11–27, 2026). The unit continued its licensing review, ESIA technical review participation, database updates, and stakeholder follow-up.

WASTE & REMEDIATION (WRU) UNIT

During the second quarter of 2026, the Waste & Remediation Unit (WRU) maintained ongoing assessments of waste service providers' facilities and contributed to multiple Environmental and Social Impact Assessment (ESIA) site-verification exercises arising from technical review sittings, ensuring compliance with environmental standards and regulatory requirements. The unit represented the Department at the World Environment Day (WED) celebration and attended the third session of the "Know Your Environment" (KYE) series conducted by the EPA's Planning and Policy Department. The unit maintained regular follow-up communications by phone with proponents awaiting response letters, participated in ESIA meetings and consultation activities, and prepared responses and certificates of accreditation for waste companies.

PROGRESS TRACKING Q2 2026

KEY PERFORMANCE INDICATORS (KPIs) – Q2 2026

The KPI results for the second quarter of 2026 reflect continued progress across the reporting units' core mandates, while highlighting areas requiring further support and strategic intervention.

Table 1: Key Performance Indicators (KPIs) – Progress Tracking Q1–Q2 2026 (Cumulative)

Unit	Output	Key Deliverable	Q1 2026	Q2 2026	Q3 2026	Q4 2026	Cumulative (H1)	Annual Target	% Achieved
Radiation Safety Unit	1	Develop and Legislate Nuclear Act of Liberia 2026	In Progress	Responded to the second set of IAEA comments on the Radiation Safety Act			In Progress	1 Act	
	2	Conduct Basic Radiation Trainings for 50 Radiographers and 50 Radiation workers for health Facilities and Industrial and Mining facilities	0	0			0	100 Workers	0%
	6	Conduct Nationwide inventory of Radiation	0	7 medical facilities + 4 mining-radiation			11	50 Facilities	22%

		Sources at about fifty (50) health, mining and industrial facilities across Liberia.		monitoring inventories (11 total)					
Chemical Management Unit	4	Conduct Nationwide Chemical inventory at about 60 industrial facilities across Liberia.	None conducted	1 nationwide inventory (LIDA, Freeport, Monrovia)			1	60 Facilities	1.7%
	7	Issue chemical registration and importation licenses to 60 proponents	41 Chemical Registration + 6 Chemical Importation licenses issued	10 Chemical Registration + 4 Chemical Importation licenses issued			61 (47 Q1 + 14 Q2)	60 Proponents	101.7% - Target Met
	9	Issue annual effluent discharge licenses to about 30 proponents across Liberia	4 Effluent Discharge licenses issued	4 Effluent Discharge licenses issued			8 (4 Q1 + 4 Q2)	30 Proponents	26.7%
	14	Issue chemical disposal licenses to five (5) proponents	None issued	None issued			None	5 Proponents	0%
	15	Issue fumigation	4 Fumigation licenses issued	3 Fumigation licenses issued			7 (4 Q1 + 3 Q2)	10 Proponents	70%

		licenses to 10 proponents							
	16	Issue licenses to four (4) chemical transporting firms	3 Transportation licenses issued	1 Transportation license issued			4 (3 Q1 + 1 Q2)	4 Firms	100% - Target Met
	17	Restore or remediate five (5) polluted sites.	None reported	1 site remediated: Sethi Ferro Fabrik, Iron Factory (14-day exercise)			1	5 Sites	20%
	20	Conduct training of fumigation applicators	None reported	1 BCRP training conducted (Bong County, April)			1 training conducted	All existing applicators	
Environmental Monitoring Unit	3	Equip EPA central laboratory, with advanced analytical equipment, reagents & field compliance monitoring tool kits including mobile laboratory	Ongoing	Ongoing			Ongoing	1 Lab & 1 Mobile Lab	

	5	Hire two (2) Lab technicians, two (2) quality control officers, and two (2) laboratory supervisors for quality laboratory delivery services	Ongoing	Ongoing			Ongoing	6 Staff	
	8	Issue annual laboratory accreditation to about 12 analytical laboratories	None issued	6 laboratory accreditations issued (BMMC x4, GLM, ArcelorMittal)			6	12 Laboratories	50%
	10	Analyze environmental quality media (water, soil, sediments, air, noise, vibration, vegetation) and conduct environmental monitoring	53 lab results processed; 44 site verifications conducted	36 lab results processed; 66 environmental investigations conducted			89 lab results; 110 investigations	All required facilities	
	11	Review, Update, and Validate the	Ongoing	Ongoing			Ongoing	1 Manual	

		2022 Environmental Inspection Manual of Liberia							
	12	Review Environmental monitoring reports submitted by 100 proponents.	34 environmental monitoring reports reviewed	27 environmental monitoring reports reviewed			61 (34 Q1 + 27 Q2)	100 Proponents	61%
	21	Issue Annual Certification to Sachet Water Factories in Liberia	75 certificates printed; 43 certificates picked up	36 certificates printed; 32 certificates picked up			111 printed; 75 picked up	All Producers	
Waste & Remediation Unit	22	Conduct National Mapping and Registration of 100 Waste Generators and 50 Service Providers	Ongoing assessments of waste service providers	26 waste service providers assessed and classified (10 in April, 10 in May, 6 in June)			26 (Q2 only; Q1 total not separately quantified)	150 (100 Generators, 50 Providers)	17.3%
	23	Conduct Environmental Monitoring at 50 Waste Facilities	Ongoing facility assessments	Ongoing facility assessments; multiple ESIA site verifications			Ongoing	50 Facilities	

	24	Conduct five (5) Public Awareness Campaigns on Waste Segregation and Disposal	Composting training and awareness campaigns conducted	Attended World Environment Day celebration; attended 3rd KYE session			Ongoing	5 Campaigns	
	25	Issue waste management licenses to 50 waste services providers	Accreditations prepared for qualifying companies	15 applications responded to; 11 waste certificates issued			11 (Q2 only)	50 Providers	22%
Cross-Cutting / All Units (General ERRS)	13	Conduct environmental investigation and research in at least two thematic areas and publish findings in scientific journals	51 environmental investigations conducted	66 environmental investigations conducted (EMRU)			117 (51 Q1 + 66 Q2)	2 Thematic Areas	
Cross-Cutting / All Units (General ERRS)	18	Conduct two training sessions for Chemical Handlers and First Respondents	None reported	None reported			None reported	2 Training Sessions	
Cross-Cutting / All Units (General ERRS)	19	Develop an automated database system of the	Cloud database set up for document verification	Ongoing			Cloud database established;	1 System	

		ERRS Laboratory					ongoing maintenance

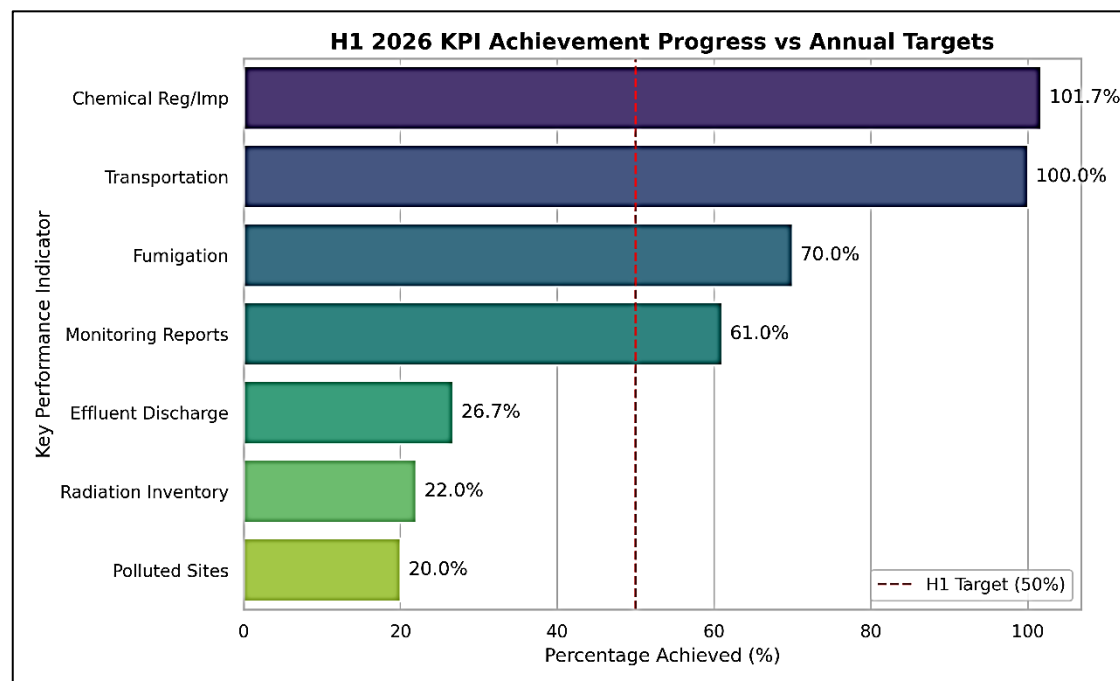

Figure 1: H1 2026 KPI Achievement Progress vs Annual Targets

Figure 1 visualizes the cumulative progress made during the first half of the year (H1) against the annual targets established for 2026. The red dashed line represents the 50% mark, which is the expected benchmark for the end of Q2. The department has already exceeded its annual target for Chemical Registration/Importation (101.7%) and reached its target for Transportation (100%). Other areas like Fumigation (70%) and Monitoring Reports (61%) are well ahead of schedule.

The Radiation Safety Unit (RSU) advanced its radiation-sources inventory, assessing seven (7) medical facilities and conducting four (4) mining-radiation monitoring investigations, each representing 22% of the annual target of 50. The summary of the unit's major activities for the quarter is presented below.

Table 2: RSU Summary of Major Activities – Q2 2026

Category	2026 (Quarter II)	Annual Target (2026)	Total Completed	Percentage Completed (%)
Number of Medical facilities inventoried	7	50	7	14%
Number of industrial facilities inventoried	0	50	0	0%
Number of Mining Radiation Monitoring and Inventories	4	50	4	8%
Number of operators/radiographers trained	0	50	0	0%
Number of trained persons under personnel monitoring	0	50	0	0%
Number of Publications	0	2	0	0%
Number of Internal Training(s) Conducted	0	N/A	0	-
Number of Bills issued	0	N/A	0	-
Number of Radiation Importation License(s) issued	0	N/A	0	-
Number of Radiation Possess & Use License(s) issued	0	N/A	0	-

KPI ACHIEVEMENTS AND REMAINING TASKS (Q2 2026)

The Chemical Management Unit (CMU) maintained strong licensing performance, issuing 56 regulatory instruments against a full (100%) response rate on the 48 applications received. Outputs included 22 formal licenses (10 chemical registration, 4 chemical importation, 4 effluent discharge, 3 fumigation, and 1 transportation license) and 34 chemical release/clearances, alongside 26 chemical escort operations.

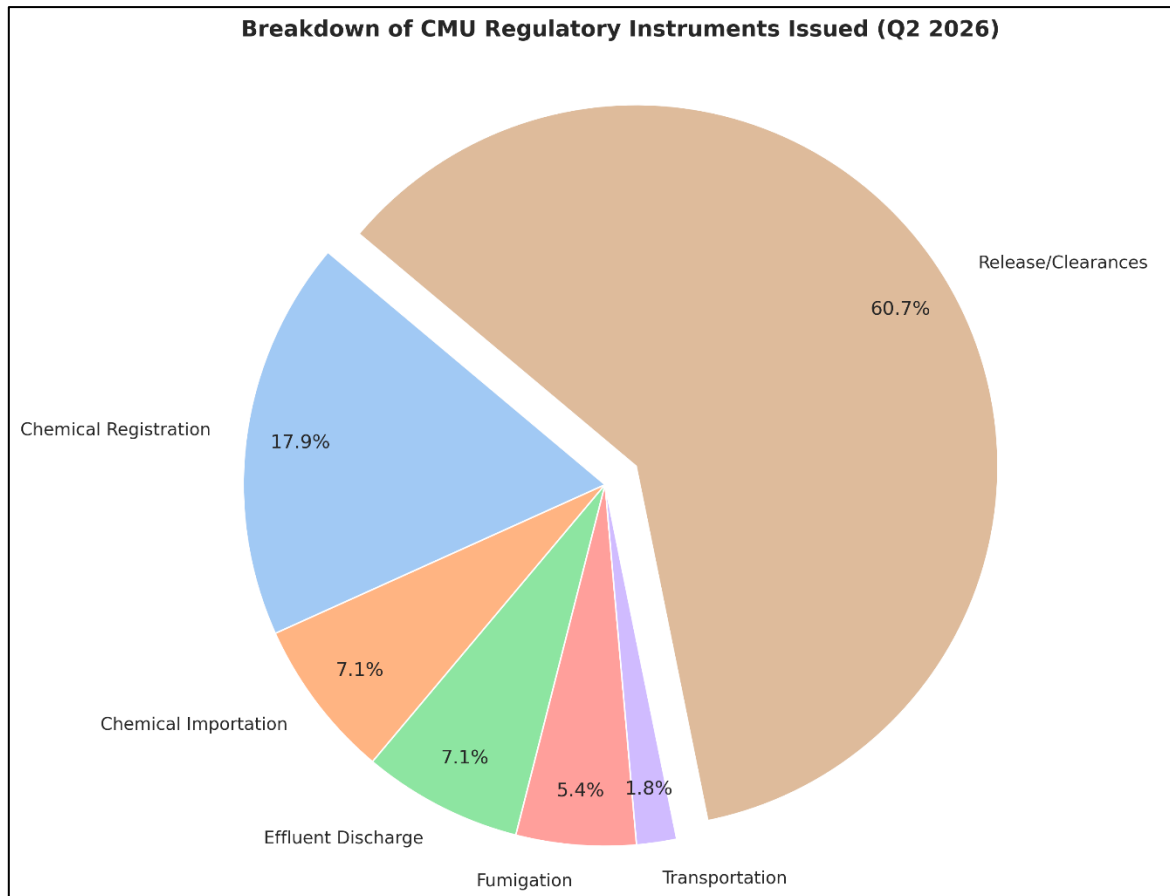

Figure 2: Breakdown of CMU Regulatory Instruments Issued – Q2 2026

This pie chart above breaks down the 56 regulatory instruments issued by the Chemical Management Unit during the second quarter. Chemical Release/Clearances dominate the unit's output, accounting for 60.7% of all instruments. This highlights the high volume of trade-related regulatory support provided by the CMU.

The Environmental Monitoring and Research Unit (EMRU) delivered strong field results: 31 application letters received and responded to, 36 laboratory results processed, 36 certificates printed (32 picked up), 6 laboratory accreditations issued, and 66 environmental investigations conducted. The EMRU quarter-over-quarter summary and overall performance grade are presented below.

Table 3: EMRU Summary of Activities by Quarter – 2026

Category	Quarter I	Quarter II
Number of Foreign Events Attended	1	0
Number of Local Events	0	0
Number of Environmental Investigations	51	66
Number of Local Trainings Conducted	0	0
Number of Sachet Water applications received	84	31
Number of Sachet Water responses	84	31
Number of Response letter issued	51	32

Category	Quarter I	Quarter II
Number of applicants who paid	49	37
Number of environmental quality analyses	53	36
Laboratory Accreditation	0	6
Number of Monitoring activities conducted	63	66
Number of Sachet Water certificates issued	43	32
Number of Sachet water certificates printed	75	36
Number of Site Verifications	44	Not separately reported
Number of Laboratory Results	53	36

Table 4: EMRU Overall Performance Grade – Q2 2026

No	Output Description	Planned Activities	Indicators	Targets	Progress	Status
1	Issue annual laboratory accreditation to analytical laboratories	Identify, inspect, validate, and accredit laboratories	Certificates issued to Six (6) labs	7 analytical laboratories	Six (6) laboratory accreditations were issued to qualifying facilities: BMMC (4 labs), GLM Inc., and ArcelorMittal Laboratory	Achieved
2	Analyze environmental quality media and monitor facilities	Conduct monitoring, analyze samples, log data, and follow up	Reports produced and follow-up actions taken	60 facilities plus emergencies	Sixty-six (66) environmental investigations and monitoring activities were conducted	Achieved

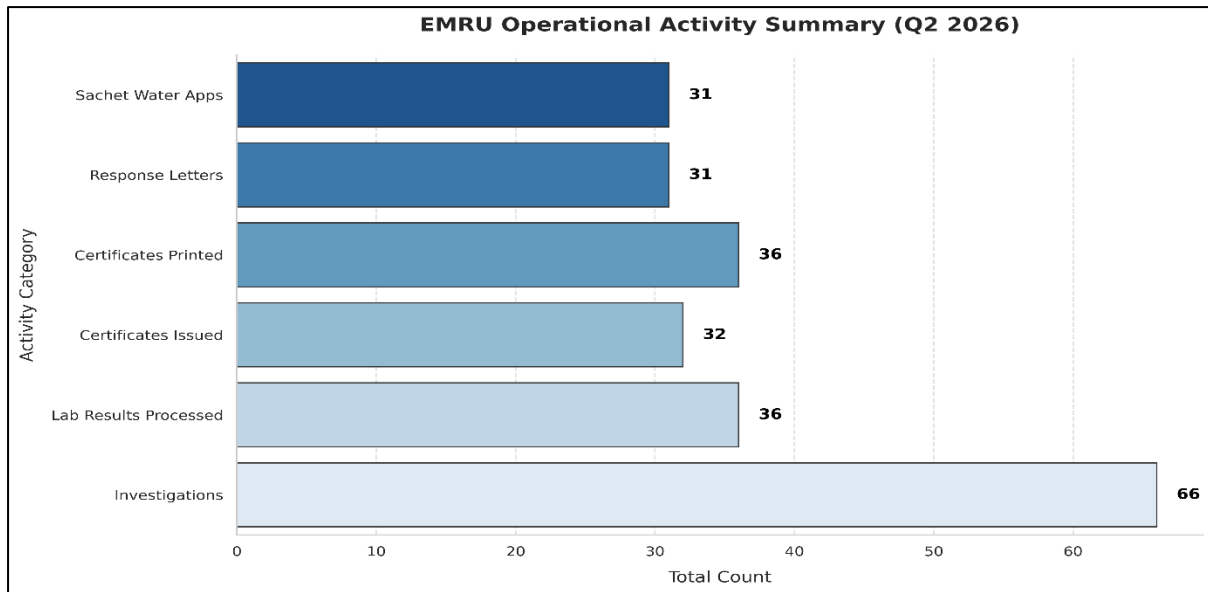

Figure 3: EMRU Operational Activity Summary – Q2 2026

The quantitative summary of the Environmental Monitoring and Research Unit's core activities, ranging from application processing to field investigations, is shown in Figure 3 above. With 66 investigations conducted in Q2, the EMRU demonstrates a very high level of field presence and community response compared to other administrative tasks.

The Radiation Safety Unit (RSU) demonstrated comprehensive regulatory oversight and enforcement during the quarter, processing radiation license applications, hosting the IAEA TC Expert Mission, participating in the Nationwide Compliance Monitoring exercise, and advancing the Radiation Safety Act through its response to the IAEA's second set of comments.

The Waste & Remediation Unit (WRU) assessed and classified twenty-six (26) waste service providers during the quarter (10 in April, 10 in May, and 6 in June), and processed fifteen (15) applications responded to with eleven (11) waste certificates issued.

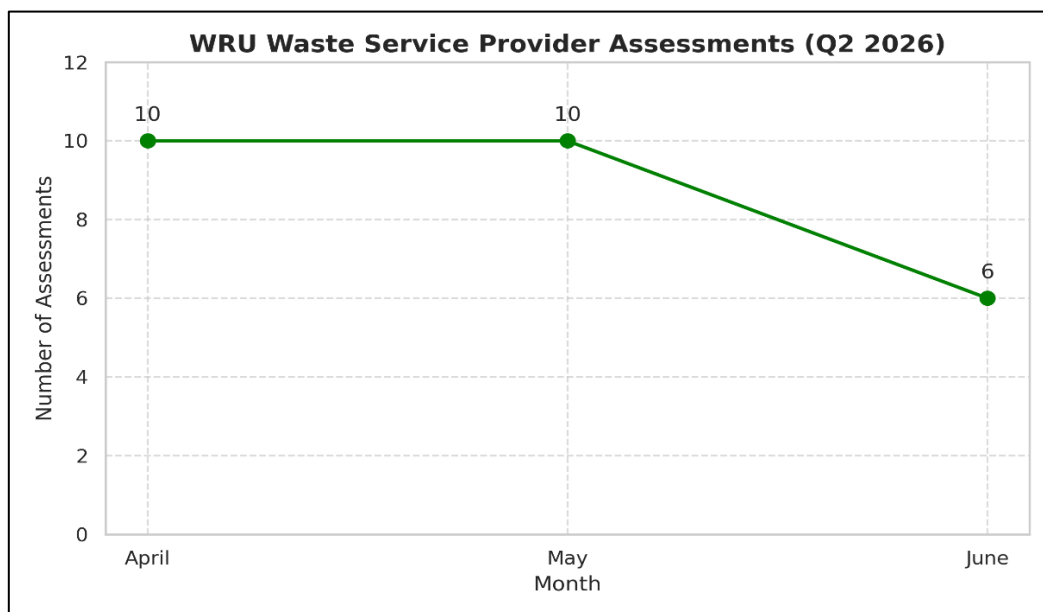

Figure 4: WRU Waste Service Provider Assessments – Q2 2026

Figure 4 tracks the number of waste service provider assessments conducted by the Waste & Remediation Unit across the three months of the second quarter. The unit maintained a steady pace of 10 assessments per month in April and May, with a slight decrease to 6 in June, totaling 26 for the quarter.

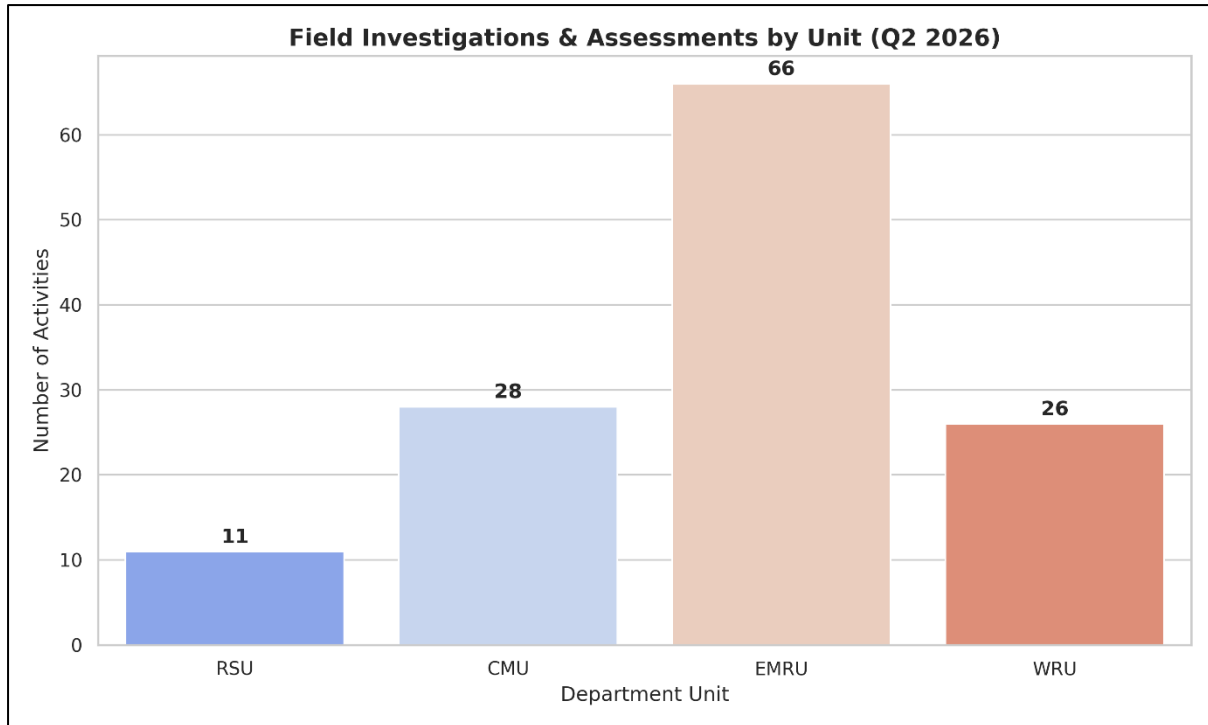

Figure 5: Field Investigations & Assessments by Unit – Q2 2026

Figure 5 compares the primary field-based activities (investigations, inventories, and assessments) across the four department units, respecting your preferred unit order (RSU, CMU, EMRU, WRU). It provides a clear "at-a-glance" view of the department's total field output (131 total activities), showing that EMRU carries the largest share of field investigations.

5.	Edward B. Perry (0886455838 / 0777011985)	Kpo River Community, Brewerville	Noise pollution complaint
6.	Madam Salimatu	R2 Community, Margibi County	Noise pollution
5	Mr. Ali Tarini (0777612626)	Old road, opposite Jubilee Church	Public disturbance cause by loud music
6	Resident of Zinc Camp (0770554633)	Zinc camp community, Logan Town island	Inproper disposal and stockpiling of garbage creating environmental health hazard.
7	Mr. Diabeson F. Beyan Jr. (0777429191)	Survival community, District 1, Lower Margibi County	Request for water sampling and inspection of their facility.
8	Lucia M. Yallah	Duport Road, Paynesville City, Montserrado	Possible water sanitation violation in my community.
TOTAL NUMBER OF COMPLAINTS RECEIVED:		EIGHT (8)	

Table 20: Environmental Investigations and Monitoring Conducted during Quarter II, 2026

No.	Investigation Description and Summary
1	April 9, 2026, formed part of a team that attended the LEAD elimination in paint workshop held in Montserrado County.
2	April 10, 2026, formed part of a team that collect paint samples from three paint factories in Montserrado County to analyze for the concentration of LEAD in those samples
3	April 11, 2026, formed part of a team that collected and analyzed for LEAD concentration in the sample paints.
4	April 13, 2026, formed part of a team that collect raw samples at Mount Wologizi Natural Water mineral water factory located in Sinkor, Montserrado County.
5	April 14, 2026, formed part of a team from Belgium and UK that conducted 3D scanning of plots to obtain numbers of mangroves and different hieght at several locations in Grand Bssa County.
6	April 14, 2026, formed part of a team in Buchanan that conducted Data collection from loggers to obtain data temperature and pressure on the mangroves over the period of the past six months.

No.	Investigation Description and Summary
7	April 15, 2026, formed part of a team from Belgium and UK that conducted the measurement of the depth of sediments collected by sediments plates to obtain the rate of sediment transpotation over the past six months in mangroves.
8	April 15, 2026, formed part of a team that collected leaves from the leaf traps to obtain the rate of mangroves trees sharing or dropping leaves.
9	April 21, 2026, formed part of a team that conducted site verification at Sethi Brother (Star Cement) factory located on the Bushord Island , Montserrado County.
10	April 23, 2026, conducted complainece monitoring at BMMC facility in Grand Cape Mount County where samples were collected.
11	April 25, 2026, conducted noise pollution investigation in the R2- Community in Margibi county where Madam Salimatu complained about unusual noise in her community.
12	April 27, 2026 , formed part of a team that conducted Environmental Pollution investigation on a private property located in Marshall, Margibi County.
13	From April 3, 2026 - April 20, 2026 formed part of a team that monitored the remediation activities carried out by a third party firm that was hired to conduct environmental cleaning up and restorations in the Iron factory community, Japanese Freeway, Montserrado County
15	April 30, 2026, a joint team of technicians conducted compliance monitoring at the Arcelormetal facility located in Yekepa, Nimba County.
16	On May 12, 2026, an assessment was conducted at the various facilities of Sethi Brothers Oxygen Plant & Steel Factory. Located in the LPRC community, Industrial Park
17	On May 12, 2026, an assessment was conducted at the various facilities of Steel Force LLC, including a supermarket in Gardnersville.
18	On May 12, 2026, an on-site assessment was conducted at the various facilities of Jahmale Medical Center. Located in Paynesville City, the ELWA junction.
19	May 28, 2026, formed part of a team that conducted a noise pollution investigation at Catholic Junction against the Hawaii Infrastructure Liberia Inc., based on a complaint filed by Dr. Zhai Yu of Mercy Medical Facility
20	May 18, 2026, formed part of a team that conducted compliance monitoring at Upper Northern Mineral Company, located in Nicom Town, Brai District, Grand Gedeh County.
21	On May 19, 2026, a team conducted compliance monitoring at Euro Liberia Logging Company in Duo Town, Putu District, Grand Gedeh County.
22	May 19, 2026, formed part of a team that conducted compliance monitoring at Alex Gee Group of Companies, located in Bellayella, Konobo District, Grand Gedeh County.
23	May 20, 2026, formed part of a team that conducted compliance monitoring at Tugbah Tugbah Group of Companies (Gold Mining), located in New Creek, Konobo District, Grand Gedeh County.

No.	Investigation Description and Summary
24	May 20, 2026, formed part of a team that conducted compliance monitoring at Harris David Mining Company (Gold Mining), located in New Creek, Konobo District, Grand Gedeh County.
25	May 21, 2026. Formed part of a team that conducted compliance monitoring at Blue Print Investment Company (Gold Mining), located in Jawoe #2, Konobo District, Grand Gedeh County.
26	May 21, 2026, formed part of a team that conducted compliance monitoring at EMG Consultant Limited (Gold Mining), located in Bilibo Town, Konobo District, Grand Gedeh County.
27	May 22, 2026, formed part of a team that conducted compliance monitoring at Liberal Pure Mineral Water Factory, located in Zwedru City, Grand Gedeh County.
28	May 22, 2026, formed part of a team that conducted compliance monitoring at Bless Water Factory, located on Tchien White Street, Zwedru City, Grand Gedeh County.
29	May 22, 2026, formed part of a team that conducted compliance monitoring at Mr. Ben Pyne's one-story construction site, located in Zwedru City, Grand Gedeh County.
30	May 22, 2026, formed part of a team that conducted compliance monitoring at CASH Mineral Water Factory, located in Zwedru City, Grand Gedeh County.
31	May 22, 2026, formed part of a team that conducted compliance monitoring at Ebenezer Funeral Services, located in Zwedru City, Grand Gedeh County.
32	May 22, 2026, formed part of a team that conducted compliance monitoring at ABC Mineral Water Factory, located in Welobo Quarter, Zwedru City, Grand Gedeh County.
33	May 22, 2026, formed part of a team that conducted compliance monitoring at Golden Frozen Food Branch #2, located in Zwedru City, Grand Gedeh County.
34	May 22, 2026, formed part of a team that conducted compliance monitoring at Marche Business Center (Cold Storage), located in Zwedru City, Grand Gedeh County.
35	May 22, 2026, formed part of a team that conducted compliance monitoring at B & H Mineral Water Factory, located in Niao Community, Zwedru City, Grand Gedeh County.
36	May 23, 2026, formed part of a team that conducted compliance monitoring at Gayton Malliluim Group of Companies (Gold Mining), located in Gonwoopa, Zwedru City, Grand Gedeh County.
37	May 25, 2026, formed part of a team that conducted compliance monitoring at a GVL facility, located in Sinoe County.
38	May 25, 2026, formed part of a team that conducted compliance monitoring at a GVL facility, located in Tarjuowon, Sinoe County.
39	May 25, 2026, conducted compliance monitoring at LINQI Mineral Mining Facility, located in Blue Barrack Community, Sinoe County.
40	May 25, 2026, formed part of a team that conducted compliance monitoring at Lina's Cold Storage, located on Johnson Street, Greenville, Sinoe County.

No.	Investigation Description and Summary
41	May 25, 2026, formed part of a team that conducted compliance monitoring at 2 Real Water Factory, located in Morrisville, Plank Site, Greenville, Sinoe County.
42	May 25, 2026, formed part of a team that conducted compliance monitoring at Bangalee Fresh Mineral Water Factory, located in Greenville City, Sinoe County.
43	May 25, 2026, formed part of a team that conducted compliance monitoring at Sinoe Pure Mineral Water Factory, located in Plank Site, Greenville City, Sinoe County.
44	May 25, 2026, conducted compliance monitoring at Creative Mineral Water Factory, located in Morrisville, Plank Site, Greenville, Sinoe County
45	May 25, 2026, conducted compliance monitoring at Senokree Spring Mineral Water Factory, located in Seebeh Community, Greenville City, Sinoe County.
46	May 25, 2026, conducted compliance monitoring at Ma-J Mineral Water Factory, located in the Mississippi Street Community, Greenville City, Sinoe County.
47	May 26, 2026, formed part of a team that conducted compliance monitoring at UIC (United Trading Corporation – Cold Storage), located in Congo Town, Greenville, Sinoe County.
48	May 26, 2026, conducted compliance monitoring at Marche Business Center #2 (Cold Storage), located in Greenville City, Sinoe County.
49	May 28, 2026, formed part of a team that conducted a noise pollution investigation on 1st Street, Sinkor, against Wonder Double Ministry, based on a complaint filed by Mr. Mazen K. Halabi.
50	June 2, 2026, formed part of a team that conducted a noise pollution investigation at Catholic Junction following a complaint filed by Dr. Zhai Yu of Mercy Medical Facility against Hawaii infrastructure Liberia Inc.
51	June 2, 2026, Formed part of a team that conducted an environmental and public health hazard investigation at the residence of Mr. Nathan W. Birch on Kesselley Bpulevard, Gardnersville.
52	June 8, 2026, Formed part of a team that conducted a wetland assesement in the GSA community, Zinnah Hill Junction, to determine whether the area under investigation was classified as wetland or dry land.
53	June 22, 2026, Participate in the presentation of the investigative unit findings from a noise and soil pollution investigation conducted in the kesselley Boulevard community.
54	June 12, 2026, Formed part of a joint team that participated in a stakeholder meeting in the Bomi Bridge, Brewerville community, regarding Bea Mountain company propose construction of a sports academy.
55	June 15, 2026, Formed part of a team that conducted a field assessment and water sample collection at Bassa Point, electoral disttrict #1,Grand Bassa County, to establish the community drinking water
56	June 2, 2026, Formed part of a team that collected drinking water samples from a resident for laboatroy quality testing and analysis.

No.	Investigation Description and Summary
57	June 24, 2026, Formed part of a team that conducted an environmental investigation into the effects of blasting activities by fishermen in the Stephen Tolbert Estate Community, Montserrado County.
58	June 24, 2026, Formed part of a team that conducted an environmental pollution invetsigation concerning the large-scale accumulation of solid waste (garbages) in the Zinc camp community, Logan Town.
59	June 26-28, Formed part of a team that conducted an environmental assessment along the Baochico road corridor, from the concession area from Gbarpolu county to the Freeport of Monrovia
60	June 14, 2026, Participated in a joint NWASH inspection and monitoring exercise at Mu.Bama Mineral Water, located in Don Bosco, VOA raod.
61	June 13, 2026, Participated in a joint NWASH inspection exercise at Sky Fresh Mineral Water, located in Brewervill community, Montserrado county.
62	June 17, 2026, Participate in a joint NWASH inspection of Rhema Spring Natural Mineral Water, located in Brewervill community.
63	June 16, 2026, Participate in a joint NWASH inspection at Nelpadse Mineral Water, located in yellow flower community, Brewerville.
64	June 19, 2026, A team participated in the presentation of findings from the Lead in Paints Investigation and analysis conduceted by Mr. Jerry Toe, the Focal Person in collarboration with international partner.
65	June 15, 2026, A team participtaed in the presentation of findings from the wetland investigation before the Payneville Magesterial Court.
66	June 22, 2026, A team participated in te presentation of findings from the noise pollution investigation conducted in the Kesselly Boulevard community.

Table 27: Sachet Water Activity Summary - Q2 2026

Variable	Frequency
Total Application Letters Received	31
Total Application Responded To	31
Total Response Letters Picked Up	32
Total Applicant that Paid	37
Total Certificate Printed Out	36
Total Certificate Picked Up	32
Total Lab Result	36

Summary

In the second quarter of 2026, the largest categories were applicants who paid (37, 15.7% of total activity), certificates printed (36, 15.3%), and laboratory results processed (36, 15.3%), each reflecting strong back-end processing activity. Application letters received and responded to each accounted for 31 (13.2% each), while response letters and certificates picked up each reached 32 (13.6% each), indicating a strong completion rate relative to applications received. Overall, the unit demonstrated solid processing efficiency across the sachet-water certification pipeline, with high and closely-matched rates of payment, certification, and laboratory completion.

ERRS INVESTIGATION – LABORATORY ANALYSIS

Comments on Companies and Parameters

Environmental monitoring performance for April to June 2026 shows progress in reporting timeliness, while incomplete parameter coverage across water, air, and soil monitoring persists — a continuing compliance concern that weakens the national environmental monitoring framework.

REPORTING COVERAGE AND TIMELINESS

APRIL 2026

Proponents: 12

Sites: 15

On-time submissions: 7

Late submissions: 3

Non-reporting: 2

MAY 2026

Proponents: 6

Sites: 15

On-time submissions: 4

Late submissions: 1

Non-reporting: 1

JUNE 2026

Proponents: 9

Sites: 14

On-time submissions: 4

Late submissions: 5

Non-reporting: 0

On-time submissions: 4

Late submissions: 5

Non-reporting: 0

General Compliance: In April, out of twelve (12) companies assessed, one (1) company was disqualified and returned to ESIA for non-compliance (no permit and no laboratory capacity).

In May, out of five (5) companies assessed, one (1) company was disqualified and returned to ESIA for non-compliance. In June, compliance was analyzed using WHO benchmark standards, and companies such as ArcelorMittal Liberia, among others, were disqualified and returned to ESIA for non-compliance.

Actions Taken: The EPA delivered its 2nd-quarter monitoring reports to strengthen environmental integrity; reviewed submitted reports against WHO benchmarks and national standards; documented proponents with late submissions and incomplete parameter reporting; issued structured feedback regarding missing parameters and timeline gaps; developed a standardized reminder format and issued eighteen (18) reminder letters to non-compliant proponents across Liberia; and compiled surveillance findings to guide targeted compliance monitoring and follow-up actions.

WASTE & REMEDIATION (WRU) UNIT

Activities Summary for the Quarter (April–June 2026)

The Waste & Remediation Unit (WRU) is charged with developing environmental regulations, guidelines, and standards that translate the goal of environmental protection into quantified, enforceable requirements, and with conducting scientific analyses to validate proponents' adherence to those requirements. The Unit also oversees regulations related to waste and pollution sources to assess and control their environmental impact.

Table 56: WRU Outstanding Achievements – Q2 2026

Outstanding Achievements – Q2 2026
Ongoing assessment of waste service providers' facilities.
Contributed to multiple Environmental and Social Impact Assessment (ESIA) site verification exercises arising from technical review sittings, ensuring compliance with environmental standards and regulatory requirements.
Attended the World Environmental Day (WED) celebration
Attended the third session of the "Know Your Environment" (KYE) conducted by the Planning and Policy department of the EPA
Regular follow-ups through phone calls to proponents for response letters
Participated in ESIA meetings and consultation activities
Prepared responses and certificate of accreditation for Waste companies.

Table 57: WRU Waste Service Providers Registered – April 2026

No.	Company Name	Undertaking
1.	New Era Groups of Companies	Hazardous
2.	Duty to Country Sanitation Inc.	Non-Hazardous
3.	Talwa Sanitation & Alternative Energy	Hazardous (Medical)
4.	New Era Groups of Companies	E-Waste

No.	Company Name	Undertaking
5.	Richtrans-IPCLL Corporation	Non-Hazardous
6.	Phoenix Waste Management	Non-Hazardous
7.	Liberia Waste and Environmental Solutions	Hazardous (Plastic)
8.	OCEANS	Disposal
9.	Western Region Multi-Purpose Company	Hazardous (Scrap)
10.	Jah's Professional Service	Hazardous (Used Oil, Lubricant, Batteries)

Table 58: WRU Waste Service Providers Registered – May 2026

CHALLENGES

CHEMICAL MANAGEMENT UNIT (CMU)

Challenges:

- **Lack of Personal Protective Equipment (PPE):** Contractors handling chemicals lack the necessary PPE to guarantee safety and compliance with occupational health and safety regulations.
- **Inadequate Workspace and Furniture:** The current workspace available to the Unit and the ERRS Department, while adequate, lacks proper furniture, preventing the team from properly organizing documents and equipment.
- **Insufficient IT Infrastructure:** The unit lacks laptops for staff, resulting in feeble performance of unit operations.
- **Free Port Implementation Setbacks:** The Unit experiences setbacks in the effective implementation of its duties at the free port of Monrovia due to pending training by the National Port Authority (NPA).

ENVIRONMENTAL MONITORING AND RESEARCH UNIT (EMRU)

Challenges:

- **Monitoring activities delayed** due to poor road conditions, limited logistics, and reliance on a personal low-clearance vehicle, which restricts access to sites and poses safety and equipment risks.
- **Low proponent engagement**, with late and partially compliant report submissions, weakening report tracking and reducing the value of data for timely decision-making.
- **Frequently missing key environmental parameters** (NO₃, CO, NH₄, PM_{2.5}, and consistent pH), alongside variable compliance with national standards and EPA benchmarks.
- **Gaps in technical capacity**, supervision, and enforcement.
- **Need for police personnel** during site verifications to strengthen compliance and support smooth field operations.

RADIATION SAFETY UNIT (RSU)

Challenges:

- **Insufficient number of vehicles** for the ERRS Department for assessments, monitoring, inspections, and inventories.
- **Delay in the publication** of the draft Regulation to support and affirm full regulatory activities.

- Inadequacy of training for RSU staff to use the RADCAL test kit for Quality Control testing at various facilities.
- Inadequacy of training for RSU staff in the operation of the RADKOR Dosimetry System for personnel dose assessment and reporting.
- Technical issue with the RAIS reporting system, hindering the updating of the database for reporting Regulatory Authority Information to the IAEA.
- Insufficient training in the use of RASIMS to report on the country's TSAs, and incomplete establishment of regulatory control for internal (national) reporting responsibilities.
- Insufficiency in the number of competent staff within the Unit.
- Insufficient logistics and support to conduct inventory at medical and industrial facilities possessing radiation-generating devices/sources in the counties.

WASTE & REMEDIATION UNIT (WRU)

Challenges:

- Limited logistics: lack of computers, vehicles, and fuel for fieldwork.
- Poor internet service and no printer.
- Insufficient staffing to meet workload demands.
- Lack of scratch cards to communicate with proponents and amongst staff.
- Delay in processing documentation from receipt to certification due to the lack of logistics.

RECOMMENDATIONS

CHEMICAL MANAGEMENT UNIT (CMU)

Recommendations:

- Provide PPE for chemical handlers to mitigate risks associated with chemical exposure and enhance overall safety standards within the unit's operations.
- Purchase two laptops for the staff in the Unit.
- Improve interdepartmental and unit coordination and collaboration.
- Provide better furniture for the Unit and the ERRS Department to enable proper organization of documents and equipment.
- Expedite the proposed National Port Authority (NPA) training to resolve setbacks in the unit's duties at the free port of Monrovia.

ENVIRONMENTAL MONITORING AND RESEARCH UNIT (EMRU)

Recommendations:

- Strengthen reporting compliance through clear deadlines, legal enforcement, and structured follow-up for late submissions.
- Mandate complete parameter reporting, with emphasis on NO₃ and consistent pH monitoring across all proponents.
- Provide technical guidance and capacity building to improve data quality and regulatory adherence.
- Enhance routine monitoring through spot checks, periodic audits, and expanded digital reporting systems for timely, complete, and real-time surveillance.
- Escalate corrective actions by enforcing action plans and prioritizing repeat non-compliant sites in line with EPA frameworks.
- Provide an EPA vehicle to improve field mobility, productivity, and timely completion of activities.
- Provide additional computers and software to accelerate data processing and reporting.

RADIATION SAFETY UNIT (RSU)

Recommendations / Opportunities for the next period:

- Acquire the support of Management to publish the draft Regulation.
- Sign and publish the drafted Radiation Fees Schedule (Schedule 5).
- Follow up on the request to the IAEA for technical support to resolve issues with the RAIS system.
- Increase national inventory coverage to about 85% for medical practices involving the use of radiation in Liberia.
- Increase national inventory coverage to about 85% for industrial practices involving the use of radiation in Liberia.
- Acquire adequate in-country or out-of-country training for staff on the RADCAL kit and software, the RAIS database, and the operation of the OSLD machine for dose assessment.
- Calibrate all survey meters, contamination meters, and radio-identifiers before the end of 2026.
- Provide basic occupational radiation safety training to all medical facilities in Liberia whose practices involve the use of ionizing radiation.
- Extend personnel monitoring services to operators in medical practices involving the use of radiation.
- Attract more foreign training courses to enhance the skill set and competence of RSU staff.
- Recruit new radiation protection staff or transfer trained radiation protection staff to the Unit.

WASTE & REMEDIATION UNIT (WRU)

Recommendations:

- Address the outlined logistical constraints — computers, vehicles, fuel, and internet — to enable technicians to respond adequately to emerging environmental incidents and conduct more inspections and assessments of waste companies.
- Retain the two (2) interns trained by the Unit, who have proven helpful to its operations.
- Provide requisite training opportunities and upgrading for staff to enhance their work in scientific research, compliance monitoring, and data logging.
- Improve specificity in task assignment so that responsibility for who is doing what, and when, is clear.

CONCLUSION

The second quarter of 2026 marked a period of sustained regulatory action and operational delivery for the Environmental Research and Radiation Safety (ERRS) Department. Across its core mandates of environmental monitoring, chemical management, radiation safety, and waste remediation, the reporting units demonstrated continued commitment to safeguarding Liberia's environmental integrity and public health. The Chemical Management Unit (CMU) maintained robust operational efficiency, issuing fifty-six (56) regulatory instruments at a full response rate, conducting twenty-six (26) chemical escort operations, and supervising a fourteen-day chemical-waste remediation exercise at the Sethi Ferro Fabrik facility.

The Environmental Monitoring and Research Unit (EMRU) maintained rigorous oversight through sixty-six (66) environmental investigations, the processing of thirty-six (36) laboratory results, the issuance of six (6) laboratory accreditations, and the management of the sachet-water certification pipeline, despite persistent challenges with delayed reporting and incomplete parameter coverage. The Radiation Safety Unit (RSU) advanced its regulatory framework by hosting the IAEA Technical Cooperation Expert Mission, participating in the Nationwide Compliance Monitoring exercise, and responding to the IAEA's second set of comments on the Radiation Safety Act, while inventorying seven (7) medical facilities and conducting four (4) mining-radiation investigations.

The Waste & Remediation Unit (WRU) sustained its ongoing assessments of waste service providers and contributed to multiple ESIA site-verification exercises, while representing the Department at national and international environmental events. Across the department, performance continued to be constrained by cross-cutting systemic challenges — inadequate logistical resources (vehicles, fuel, and computers), insufficient IT infrastructure, and the need for specialized technical training in dosimetry, laboratory analysis, and regulatory reporting systems. Strategic investment in these areas remains imperative to enhance the ERRS Department's operational resilience, ensure stricter regulatory compliance, and fully realize its mandate of protecting Liberia's environment in the quarters ahead.
